Maitland St MUSWELLBROOK NSW

Time: 6pm

Day and date: Wednesday 18 November 2009.

Further inquires (02) 4908 6800.

AN INVITATION
TO ATTEND A PRESENTATION
BY

Dr. DICK van STEENIS, MBBS

December, 9th 2009 at Singleton RSC York Street at 7pm

An invitation is extended to the Singleton Community to come along, listen and consider a presentation by Dr. Dick van Steenis MBBS from the United Kingdom.

Dr. Van Steenis is a medical scientist who has extensively researched air quality impacts on health. His research is held in high regard world wide. He has been published in four peer reviewed journals including the highly regarded Lancet medical journal, and has spent considerable amounts of time researching and promoting the unpalatable truths about PM2.5s fine particulate matter and emissions. Dr van Steenis will be visiting Gloucester, Quirindi, Muswellbrook and Singleton before leaving Australia.

Dr. van Steenis states

"I have attempted to sort the health effects of industrial PM2.5 emissions to air, explaining processes, cocktail effects, dietary protection, altered gene functions and other factors enabling me to propose constructive, affordable ways forward for public health"

We hope that you will be able to attend.
